Road Departure Mitigation System (RDM)¹² (Honda Sensing® feature)

⁶ VSA is not a substitute for safe driving. It cannot correct the vehicle's course in every situation or compensate for reckless driving. Control of the vehicle always remains with the driver.

⁷ Always visually confirm that it is safe to drive before backing up; the rearview camera display does not provide complete information about all conditions and objects at the rear of your vehicle.

⁸ For optimal tire wear and performance, tire pressure should be checked regularly with a gauge. Do not rely solely on the monitor system. Please see your Honda dealer for details.

⁹ FCW cannot detect all objects ahead and may not detect a given object; accuracy will vary based on weather, speed and other factors. System operation affected by extreme interior heat. FCW do include a braking function. Driver remains responsible for safely operating vehicle and avoiding collisions.

¹⁰ LDW only alerts drivers when lane drift is detected without a turn signal in use. LDW may not detect all lane markings or lane departures; accuracy will vary based on weather, speed and road con System operation affected by extreme interior heat. Driver remains responsible for safely operating vehicle and avoiding collisions.

¹¹ CMBS cannot detect all objects ahead and may not detect a given object; accuracy will vary based on weather, speed and other factors. System operation affected by extreme interior heat. Syster to mitigate crash forces. Driver remains responsible for safely operating vehicle and avoiding collisions.

¹² Road Departure Mitigation only alerts drivers when lane drift is detected without a turn signal in use and can apply mild steering torque to assist driver in maintaining proper lane position and/or pressure to slow the vehicle's departure from a detected lane. RDM may not detect all lane markings or lane departures; accuracy will vary based on weather, speed and road condition. System ope affected by extreme interior heat. Driver remains responsible for safely operating vehicle and avoiding collisions.

LKAS may not detect a markings; accuracy will vary based on weather, speed and road condition. System operation affected by extreme interior heat. Driver remains responsible for safely operating vehicle and avoiding c

¹⁴ ACC with Low-Speed Follow cannot detect all objects ahead and may not detect a given object; accuracy will vary based on weather, speed, and other factors. ACC should not be used in heavy tr weather, or on winding roads. Driver remains responsible for safely operating vehicle and avoiding collisions.

¹⁵ Display accuracy will vary based on weather, size of object and speed, and the display may not show all relevant traffic. The display is not a substitute for your own direct visual assessment of traffi before changing lanes.
